

A PHONE SYSTEM DESIGNED BY PIZZA PEOPLE FOR PIZZA PEOPLE!

Fidelity SkyTalk - Saves You Dough!

Fidelity SkyTalk is a Leading Supplier of communication solutions to Pizza Restaurants in the US. All Fidelity installations include a complimentary network performance assessment.

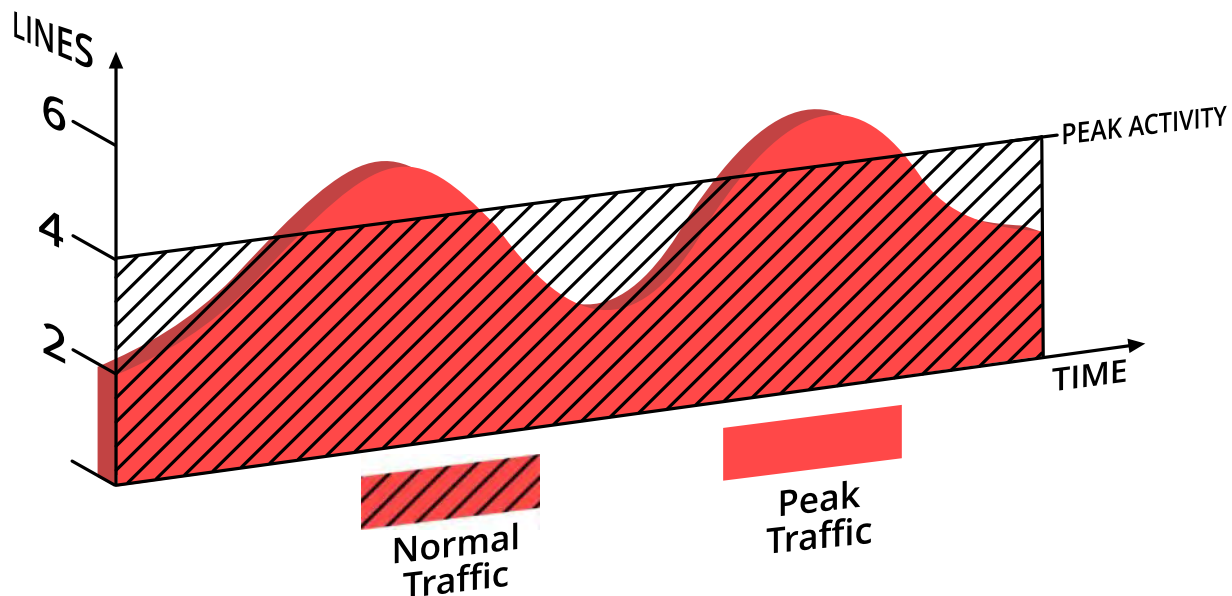

SIP Trunk Line - Eliminate Existing Phone Line Charges

Happy with your existing telephone equipment? You can still save dough with SIP Trunks. SIP Trunks provide a fixed low monthly charge that includes domestic long distance and seamlessly adapts to your existing telephone system.

Saving with SIP Trunks versus traditional telephone lines typically result in 40% or more savings. SIP Trunks also deliver bonus features. They provide built in fault tolerance and recovery as well as **Call Bursting** which allows our telephone system to exceed normal call volumes during periods of peak utilization.

Customers Never Get a Busy Signal!

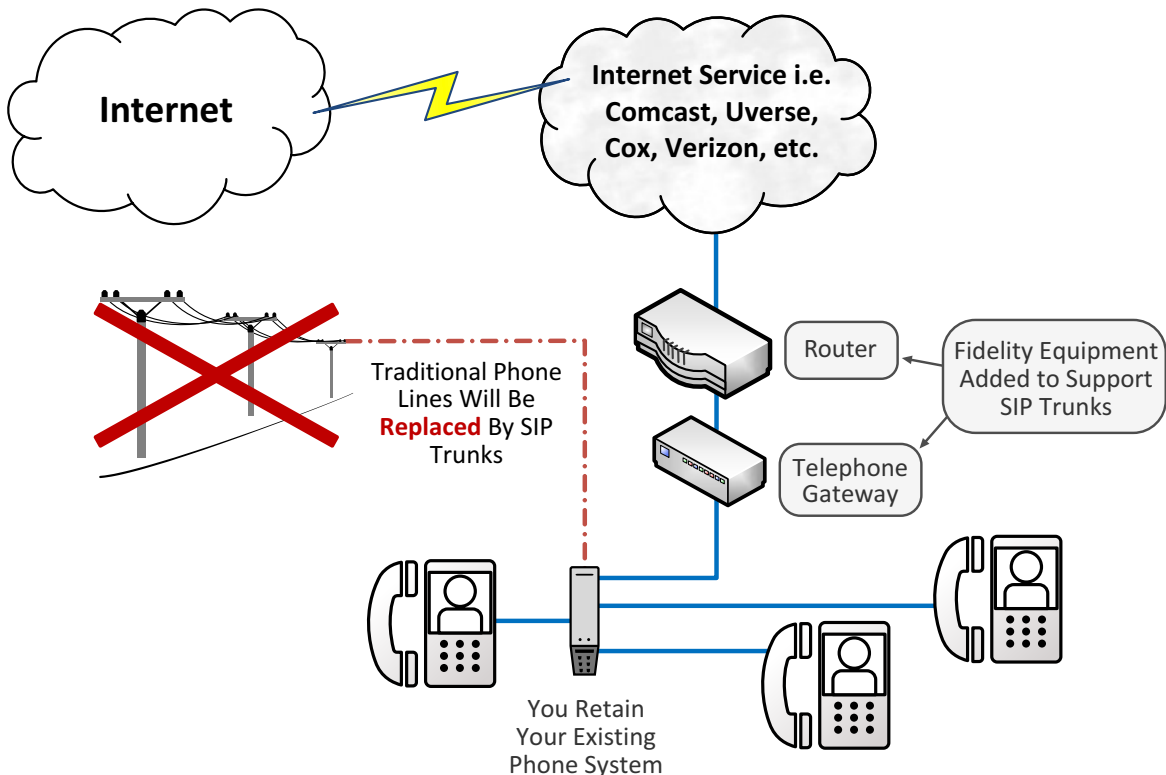

For example, if you currently have 4 copper lines and they are all in use, the 5th customer will receive a busy signal. At this point they may simply call your competitor and replace your number on their speed dial. And the worst thing is you won't even know you just lost a customer. With Fidelity SkyTalk bursting (4 lines busy) the customer will still get through.
